anthonymendoza.vercel.app | github.com/hakdogins27

Summary

Software engineer with experience on Zalio's founding team, delivering full-stack products with TypeScript, React, Next.js, Python and PostgreSQL. Experience delivering CRM workflows, AI marketing tools, voice-agent integrations and shared UI components, with automated testing and workflow automation.

Experience

Zalio (Momentum Health + Fitness) | Cebu City, Philippines (Hybrid)
Junior Developer, Founding Team | 5 months

- Built the CRM's Campaign Tracker and Forms: a drag-and-drop form builder, campaign calendars and dashboards, with sign-ups attributed to the originating campaign and form.
- Implemented secure lead-capture webhooks and Meta Lead Ads synchronization with duplicate prevention and explicit handling of closed forms.
- Built core Zalio Marketing features: TikTok and Instagram trend discovery, AI creative briefs, and a timeline video editor with FFmpeg rendering to MP4.
- Integrated Alex voice agents into lead-capture and calling workflows; added phone-menu navigation and voicemail handling, and reduced callback detection from 60 to 10 seconds.
- Created Zalio UI, a shared component library and interactive documentation using React, TypeScript, shadcn/ui and Tailwind CSS.
- Delivered 137 merged pull requests across six repositories, including regression-tested CRM and voice-agent changes.

Lifewood Data Technologies | Cebu City, Philippines
AI-Assisted Full-Stack Web Developer (Intern) | Jun 2025 - Dec 2025

- Built training prototypes exploring machine learning, AI features and game development.

Selected Projects

SAM - Service Automation Manager | Next.js, TypeScript, n8n, Groq

- Built a chat-based booking agent with n8n workflows that record bookings in Google Sheets, create calendar events, and pause until payment is confirmed.
- Added a live trace panel so users can follow each automation step.

BK Basketball League Platform | React, TypeScript, Firebase, Firestore, Tailwind CSS

- Built a real-time league platform for standings, schedules, player statistics and news using React and Firebase.
- Implemented Firebase Authentication for admin box-score entry and automatic MVP selection; shipped an installable PWA with offline caching.

Technical Skills

Languages: TypeScript, JavaScript, Python, SQL, HTML, CSS
Full Stack: React, Next.js, TanStack Start, Node.js, FastAPI, Tailwind CSS
Data & Delivery: PostgreSQL, Firebase, Git, Docker, Vercel, GitHub Actions, CI/CD, Vitest, Playwright
AI & Automation: n8n, LiveKit, Twilio, OpenRouter, Groq, FFmpeg, API integrations

Education

Cebu Eastern College Inc. | Cebu City, Philippines
Bachelor of Science in Information Technology, Cum Laude | Graduated May 2026
